PROFILE

Customer-service specialist with 13+ years of experience resolving complex issues, working across systems, and explaining next steps clearly. I build developer tools and cloud products in Rust and TypeScript, with a focus on reliable workflows, CI/CD, and inspectable decisions.

SELECTED TECHNICAL WORK

OMG | Rust CLI for development environments

[getomg.xyz](#)

- Built a public beta that brings system packages, language runtimes, project tasks, and vulnerability evidence into one CLI across Linux and Apple silicon macOS.
- Implemented native package backends, integration tests, documentation, and tagged release tooling. Public source: [github.com/omg-cli/omg](#).

DeployLint | Repository-aware CI/CD setup

[deploylint.com](#)

- Built a GitHub-connected flow that inspects repository evidence, previews generated GitHub Actions files and credential needs, then opens a setup pull request for review.
- Added protected deployment decisions tied to repository, commit, and policy evidence. Stack: TypeScript, SvelteKit, GitHub Apps, and Cloudflare Workers.

PROFESSIONAL EXPERIENCE

Senior Customer Service Specialist / NS&S

Feb 2022 - present

Bank of America

- Handle complex escalated consumer and internal partner requests across multiple systems; set expectations and work within established service levels.

Guest Service Specialist

Nov 2018 - Feb 2022

Walt Disney World

- Resolved research-driven consumer and internal partner cases, using multiple service systems and clear follow-through.

Customer service, fraud, and escalation roles

Dec 2012 - Nov 2018

Bank of America

- Progressed through customer service, fraud analysis, and executive escalation roles; supported coaching, claim intake, complex cases, and procedure improvements.

SKILLS & EDUCATION

Rust, TypeScript, SvelteKit, Cloudflare Workers, GitHub Actions, GitHub Apps, CLI design, troubleshooting, technical documentation, customer communication

High School Diploma | Richland High School | May 2008
